

Scott Slagle

Frontend Software Engineer | React | Next.js | TypeScript | Firebase
scottsfrentend@gmail.com | 707-365-8699 | Vacaville, CA | [LinkedIn](#) | [Portfolio](#)

Summary

Frontend Software Engineer with a React, Next.js, TypeScript, and Firebase stack, complemented by 25 years of client-facing domain experience in CRM systems, data analysis, and process improvement. Built and shipped full-stack applications including a pixel-perfect Skinstric AI clone, a Netflix clone with Firebase Auth and real-time Firestore, and a Summarist audiobook platform with Stripe billing. Translates complex business requirements into clean, performant interfaces - a skill sharpened across two decades of stakeholder collaboration at Jelly Belly Candy Company.

Technical Skills

Languages & Web: JavaScript ES6+, TypeScript, HTML5, CSS3, SCSS, TailwindCSS
Frameworks & Libraries: React, Next.js, Node.js, Prisma ORM
Backend & APIs: Firebase (Auth, Firestore), REST APIs, Stripe, Clerk
Tools & Platforms: Git, GitHub, Vercel, Figma, Jest
Domain: CRM systems (Emplifi, Salesforce, SAP), data analysis, process improvement, stakeholder communication

Experience

Skinstric AI (Remote) 2025 - Present

Frontend Software Engineer (Internship)

- Built a pixel-perfect React recreation of the Skinstric AI interface, implementing interactive diamond UI components, multi-step form handling, and API integration for the skincare analysis flow.
- Engineered responsive layouts with custom breakpoints at 1024px, 768px, and 640px, delivering consistent visual fidelity across desktop, tablet, and mobile viewports.
- Implemented hover effects, CSS animations, and visual polish to match the production design spec, using component-level state management to control interaction states.

Jelly Belly Candy Company (Fairfield, CA) 2000 - 2025

Customer Service Representative, Business Accounts

- Managed B2B client accounts and built CRM reporting pipelines in Emplifi and SAP to surface quality, packaging, and shipping trends for senior management - the same data-analysis and stakeholder communication skills that now inform how I architect frontend data flows and user-facing dashboards.

Projects

Summarist Audiobook Platform | [Live Demo](#) | [GitHub](#)

- Next.js and Firebase full-stack audiobook platform: Clerk authentication, Stripe subscription billing, custom audio player, library management, and skeleton loading states for optimised perceived performance.

Netflix Clone | [Live Demo](#) | [GitHub](#)

- React and Firebase streaming platform clone: Firebase Auth with Firestore security rules, TMDB REST API integration, dynamic content loading, and fully responsive UI with skeleton loading states.

NFT Marketplace | [Live Demo](#) | [GitHub](#)

- Next.js and TailwindCSS digital asset marketplace: data-driven asset filters, dynamic routing with /item-details/:id, responsive grid layout, and full loading state handling.

Education

Frontend Simplified 2025 - 2026

Certificate of Graduation, Frontend Web Development

University of Phoenix 2005

Bachelor of Science, Business
